Social Sciences Question paper design

- Various methods can be adopted to determine the level of learning in children, tests are the important tool for measuring their learning levels.

- If the tests are done in the same manner, the essence of it will not be effective.

- Change is the world's rule, only then new methods and dimensions can be found.

The basic objectives of using the new questionnaires are:

- This is done with the expectation that the children are just statistical and aiming at only marks not knowledge.

- Present day's children and parents simply do not care about knowledge unless they are in the process of scoring.

- Children will not learn until what they have learnt in the classroom is used in their lives.

- Learning should not be just memorising. For all these reasons, a change of testing system is essential.

Its purposes and uses,

- To bring Innovation in children's learning.

- Changes in the way of children being taught should be not just by memory but by logical thinking.

- Teaching all lessons with equal priority.

- Learning should not be a forced practice but learning should be by love.

- The main purpose is to bring cognitive development in the children

- Its mission is to develop language skills and writing skills in children.

- At first there were 47 questions and the short answer questions were more. But the questions were not encouraging the writing skills so long answer questions in the current model are more promising.

- There are totally 38 questions.

- Nine 3 mark questions and four 4 marks questions are increased along with one 5 mark question.

Instructions for preparing the question paper:

- There are Four 4 marks questions (8 to 10 points), of which only one is given a choice, which should be selected from the History theme only.

- There are 9 three marks questions (6 to 8 points) out of which choice is given to four questions one from History, one from Geography, one from Economics and one from Business Studies only.

- There are 8 questions of 2 marks out of which only two of them will have choice selected from Political Science and Sociology only.

- The question on map drawing should be asked only from the geography part and the locations, rivers, projects, natural divisions etc. Should be given in the textbook's map or given in the explanation part in the textbook.

- While preparing the question paper, the question paper should be prepared in accordance with the subject, category and objectives specified.
