SECTION C

This section has 2 case-based questions (14 and 15). Each case is followed by 3 sub-questions (a), (b) and (c). Parts (a) and (b) are compulsory. However, an internal choice has been provided in Part (c).

14. The mechanism by which the sex of an individual is determined is called sex-determination. In human beings, sex of a newborn is genetically determined, whereas in some others it is not. There are 46 (23 pairs) chromosomes in human beings. Out of these, 44 (22 pairs) control the body characters and 2 (one pair) are known as sex chromosomes. The sex chromosomes are of two types — X chromosome and Y chromosome. At the time of fertilisation, depending upon which type of male gamete fuses with the female gamete, the sex of the newborn child is decided.
- (a) Why is a pair of sex chromosomes in human beings called a mismatched pair in terms of type and size ? $\frac{1}{2} + \frac{1}{2}$
- (b) Out of male or female, which of them has a perfect pair of sex chromosomes ? In case of a perfect pair, will the gametes produced be of the same kind or of a different kind ? 1

- (c) (i) Name two animals whose sex is not genetically determined. Explain the process of their sex determination. 1+1

OR

- (ii) With the help of a flowchart only, show how sex is genetically determined in human beings. 1+1

15. A student fixes a sheet of white paper on a drawing board using some adhesive materials. She places a bar magnet in the centre of it and sprinkles some iron filings uniformly around the bar magnet using a salt-sprinkler. On tapping the board gently, she observes that the iron filings have arranged themselves in a particular pattern.

- (a) Draw a diagram to show this pattern of iron filings. 1
- (b) Draw the magnetic field lines of a bar magnet showing the poles of the bar magnet as well as the direction of the magnetic field lines. 1
- (c) (i) How is the direction of magnetic field at a point determined using the field lines? Why do two magnetic field lines not cross each other? 2

OR

- (ii) How are the magnetic field lines of a bar magnet drawn using a small compass needle? Draw one magnetic field line each on both sides of the magnet. 2

Deeksha's balanced approach to PU and JEE prep, with weekly assessments and dedicated hours, refined my strategy. Supportive teachers and a great learning environment made all the difference.

**P Sai Lekhya Deeksha Vedantu
Vidyanagar 2022-24 (Science)**

Admission to Deeksha was transformative. The VidyaDaan scholarship enabled my PU studies, while my teachers instilled skills in technology and time management. Confident in my preparation, I aim to clear the CA Foundation exam by 2025.

**Shamsudin, Deeksha Vedantu
Kengeri 2022-24 (Comm.)**

With Deeksha's expert guidance, I effectively balanced JEE and PU preparation, achieving a 99.59 percentile in JEE Main. The weekly tests, model papers, and bite-sized materials were instrumental in mastering PU topics and staying exam-ready.
